OBSERVATIONS

SITE OBSERVATIONS

SITE OBSERVATIONS

SITE OBSERVATIONS

SITE OBSERVATIONS

SITE OBSERVATIONS

— WHAT —

WE HEARD

WHAT WE HEARD | BEAUTIFICATION

Beautification is the highest priority

Open up views and remove chain link fences

Use of native, low maintenance plants

Incorporate L tracks into the design

Make sure to add lighting, but directed down

Flexible lawn spaces

WHAT WE HEARD | AMENITIES & USES

Create a place to bring dogs

On-Leash - Open walking area or pathways with dog-specific infrastructure

Off-Leash - Enclosed space where dogs can play and run

Create passive park spaces

Walking paths, benches

Different gathering spaces (sizes/locations)

Meeting point for walkers, runners, nearby residents

Family-friendly spaces

Potentially include active park elements

Sport courts such as basketball or pickleball

Workout stations/circuit, such as bars or steps

WHAT WE HEARD | COMMUNITY ART

Use park as a space to display art by local talent, students, community volunteers

Franklin Fine Arts Academy, Art on Sedgwick, Lincoln Park Community Services, and Deborah's Place (and others) are potential partners

Temporary displays could feature photo exhibits

Permanent displays could feature murals or educational pieces that reflect neighborhood history

Reflect neighborhood history

L Train/CTA

The stables

Historic homes

WHAT WE HEARD | CONCERNS/ETC.

Need to consider maintenance in the long run

Some are concerned about loitering and crime

Noise levels

Ideally will attract people who can walk since parking is limited on Orleans

Do not want frequent large gatherings to occur

There is a new park being built at Larrabee and Blackhawk that will have sport courts and a dog park
